

Swiss Summer School on Organic Chemistry

The Swiss Summer Schools, also referred to as Villars Summer Schools, are multi-day out of town courses for MSc, PhD and postdoctoral students with a focus on chemical synthesis. They offer a platform to students for the scientific exchange with peers and with experts in the field from academia and industry. Students are welcome to actively involve themselves by presenting a poster or a short communication on their research.

The 2025 Summer school covers a broad spectrum of topics closely linked to some of the most important aspects of organic synthesis such as synthetic method development, photoredox catalysis, complex natural product synthesis, and fundamental physical organic chemistry.

Target audience

The event targets PhD students, Postdocs as well as junior scientists from industry.

Teaching Body

- Prof. Olivier Baudoin, University of Basel, Switzerland
- Prof. Nicolai Cramer, EPFL Lausanne, Switzerland
- Prof. Daniele Leonori, RWTH Aachen University, Germany
- Prof. Song Lin, Cornell University, USA
- Prof. Julia Rehbein, University of Regensburg, Germany
- Prof. Michael Sherburn, The Australian National University, Canberra, Australia
- Prof. Troels Skrydstrup, Aarhus University, Denmark

Industry Lectures

- Chemspeed Technologies AG, Füllinsdorf
- Siegfried Evionnaz SA, Evionnaz
- Valsynthese SA, Brig

Registration

Deadline for registration is June 29, 2025

Registration Fees	SCS Member	Non-Member
Students/Postdoc	CHF 760	CHF 910
Senior Participant	CHF 960	CHF 1'110
Single room accommodation	+CHF 200.00	+CHF 200.00

The registration fees cover accommodation (full board) and seminar charges. The number of participants is limited to 80.

Certificate

Each participant will get a certification showing the discussed content and the acquired competences.

Organizing Committee

- Prof. Jieping Zhu, EPFL Lausanne
- Prof. em. Philippe Renaud, University of Bern
